Create easily, deliver more MindTouch UML Diagrams make it easy to create or work with new or existing UML diagrams, and also simplify diagram editing. Click and drag elements and use easy-to-see connectors to

What's New In Code Easy?

LiveReplay is a web-based interactive platform that can instantly replay a live video streaming in real time. LiveReplay allows you to monitor and record live streaming video from various websites such as Twitch, Youtube, Moblie Video and others, it supports multicast or unicast online streams. You can add as many streams as you need, then you can make it live or record (or both). It is useful for broadcasters, broadcasters, reviewers, stream quality monitors or content creators to review and verify the quality of live streaming content while it is being produced. With LiveReplay, you can pause, resume or skip a stream, and switch between live and recorded streams. You can also monitor multiple streams simultaneously. LiveReplay is a fully featured video streaming software with much more features than most other alternatives. It supports multiple network protocols (RTMP, HLS, MSE, RTSP, QUIC, SCTP, HTTP2), software encoders, streaming media formats (MP4, MP3, FLAC, OGG, WAV, AAC), video codecs (H.264, VP8, VP9, HEVC, VP9, VP9), network media protocols (RTMP, HLS, SCTP, QUIC, HTTP2, MSE). LiveReplay is based on the open source project livecode.io, which means that you can customize the applications according to your needs or change the source code to achieve specific features. LiveReplay is compatible with any major browser (Chrome, Firefox, Edge, Opera, Safari, Internet Explorer and others) and any Operating System (Windows, Linux and Mac OS). It can be installed and run on any server (Linux, Windows or Mac OS) or on a computer. You can start it using command line or web interface and you can also trigger the recorded streams from the terminal window or a dedicated button in your web browser. LiveReplay is a live streaming software that is useful to webcasters, stream quality monitors and viewers in general. It is useful for broadcasters, broadcasters, reviewers, stream quality monitors or content creators to review and verify the quality of live streaming content while it is being produced. LiveReplay is useful for network administration (TCP/IP, UDP) and web-based administration (HTTPS, HTTP/2). It also provides a standalone tool for configuring live streaming (RTMP, HLS, SCTP, QUIC). Feature Highlights: * Automatically stream video from multiple websites. * Supports live streaming and recording live streams. * Pause, resume and skip streaming. * Switch between live and recorded streaming at any time. * Record streaming content to local files. * Store your recordings and streams to your computer. * View live streaming video and watch it offline (HLS). * Pause the live streaming video (HLS)
